DEC 22 1970

ST. CLAIR COUNTY - SOLID WASTE DISPOSAL
Snuget/Paul Snuget

SPRINGFIELD, ILLINOIS 62706
AREA 217 - 525-6580

Mr. Paul Snuget
2702 Columbia Avenue
Saginaw, Illinois 62226

Dear Mr. Snuget:

On September 30, 1970 and December 1, 1970, Sanitary Inspector Richard L. Vollmer of the Collinsville Regional Office and Sanitary Inspector Andy Vollmer of the Bureau of Land Pollution Control conducted inspections of your solid waste disposal site located in Saginaw, Illinois.

The inspections disclosed the following deficiencies which this Agency feels may constitute a violation of pertinent provisions of the Environmental Protection Act:

1. The site is not adequately fenced with an entrance gate that can be locked and posted.
2. Opening and closing hours and days of operation are not clearly shown.
3. A shelter, for use by operating personnel, has not been furnished. This shelter shall be screened and provided with heating facilities and adequate lighting.
4. Provisions have not been made for safe drinking water and/or sanitary handwashing and/or toilet facilities.
5. No provisions have been made for fire protection services.
6. Spreading of refuse on the site is not confined to the smallest practical area.
7. Portable fencing is not used to prevent blowing litter from the unloading site.
8. The fill-in' area (baggage) is not covered to collect all material.
9. Refuse is not spread and compacted before its admitted to the site.

800-100-000

10. A compacted layer of at least six (6) inches of cover material is not applied to all exposed refuse at the end of each working day.
 11. Salvage operations are not conducted in a sanitary manner.
 12. Salvage operations are not confined to an area remote from the operating face of the fill.
 13. Salvage operations are interfering with the fill operation.
All salvaged materials are not removed from the landfill site daily or properly stored so that they will not create a nuisance, pest harborage, or unsightly appearance.
 14. Scavenging was observed at the site.
 15. Feeding of animals was observed on the site.
 16. Open dumping of refuse is being practiced.
 17. Open burning of refuse was observed.
 18. No insect and rodent control measures are provided.

The results of this investigation are being considered for presentation to the Pollution Control Board of Illinois. You must immediately report to this Agency any change of circumstance which you feel would alter the results of our investigation. Address any comments to C. E. Clark, Chief, Bureau of Land Pollution Control.

Very truly yours,
ENVIRONMENTAL PROTECTION AGENCY

C. W. Klaasen
